Introduction

Communities will benefit from using their own resources in an emergency. They have local knowledge and can act faster. Emergency services will prioritise danger to life, and in wide area emergencies they may delay in their response. Experience has shown that communities that have spent time planning for emergencies are better able to cope.

Aims and objectives

Antrobus Parish Council maintains this document to increase the short term resilience of the community in the event of any type of emergency. It will do this by:-

- Enabling the community to respond effectively
- Identifying key resources in the community that can assist
- Identify hazards and ways to mitigate them
- Identify vulnerable people in the community

Local risk assessment

Risks	Impact on community	What can the Community Emergency Group do to prepare?
There is a considerable distance of fields that climb up from the village hall playing fields to Antrobus Arms and the junction with A559. Rain water therefore runs downs to the village and the existing drainage is unable to cope with the flow of water.	<ul style="list-style-type: none"> ○ Flooding centre of village, some gardens in The Old Orchard and the rear of some gardens in Knutsford Road ○ Blocked access to village hall ○ Damage to property 	<ul style="list-style-type: none"> ○ Encourage landowners to improve flood defences ○ Work with local emergency responders to see if they can help with the distribution of flood warnings and any evacuation and rest centre establishment required ○ Receive from CWAC a report on mitigating flood risk. ○ Identify vulnerable residents ○ Identify buildings for refuge ○ Notify residents on village webpage/facebook/Whatsapp of location of local equipment hub stocking sandbags etc
Prolonged electricity cut or disruption in water supply	Lack of heat, light, water.	<ul style="list-style-type: none"> • Identify vulnerable residents • Identify buildings for refuge
Extreme weather	Hazards from ice and snow	<ul style="list-style-type: none"> • Identify vulnerable residents • Clear snow and ice from paths
	Extreme heat	<ul style="list-style-type: none"> • Check on vulnerable residents
Disease	Isolation of those affected	<ul style="list-style-type: none"> • Help to those in isolation (shopping) • Communication via social media
